

LANGIAL

DIGITIZING AFRICAN LANGUAGES · NGIEMBOON

Our languages, a heritage to pass on · Community collection

◆ A HERITAGE FOR OUR AFRICAN LANGUAGES

Gathering **the words and voices** of our **African languages** so they are never forgotten: those who **know them pass them on**, anyone can **learn** them, and everything remains a **gift for future generations**

LANGIAL gives a digital voice to **our African languages**. **Ngiemboon** is the most advanced language (dedicated keyboard and richest corpus), but the platform already hosts several languages, and anyone can add their own. Wherever you are, a simple **phone or computer** is enough to contribute

WHY TAKE PART

◆ Heritage

Every word and voice recorded today is a gift for the generations to come, so they don't forget their language

◆ Transmission

Those who know the language pass it on, through their translations and voices, to those who want to learn it

◆ Learning

Everyone learns from others: their language, their way of saying and pronouncing things, whatever their village

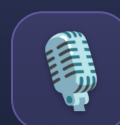

THREE WAYS TO CONTRIBUTE

Translate

Give the translation of words and whole phrases (French ↔ your language)

Transcribe

Record your voice as you pronounce the words: a treasure to preserve

Explore

Listen, learn and vote for the best improvements

Dedicated keyboards (ngiemboon and more) · works on your phone · even without internet

TAKE PART NOW

Scan, contribute in 2 minutes

- ◆ **You speak** an African language? Translate words and phrases from French
- ◆ **You understand it?** Record your voice and correct others'
- ◆ **You are learning?** Explore the library, listen and discover your language
- ◆ **No need to be an expert:** every word and every voice counts
